ACH DEBIT FILTERS – ADP COMPANY ID'S (Does not apply to wire transactions)

What is an ACH Debit filter?

An ACH Debit Filter is an automated solution that screens incoming ACH transactions to identify unauthorized transactions. Debit filters on your bank accounts help block unauthorized ACH debit transactions, making it less likely to be impacted by fraud.

What is a Company ID?

The following Company IDs allow ACH transactions to be reviewed and approved (or returned); permitting only approved transactions to post to your accounts.

What do I need to do with these numbers?

To ensure timely processing of your payroll, it's imperative that you forward the following ADP-originating Company ACH debit filter IDs to your financial institution to be set up on your account.

How do I know what ID to use?

We've made it easy by including all of the numbers you may need. Just print the table below and provide it to your financial institution.
