

Changing After-hours Call Number on Allworx System

Purpose:

Each store must maintain the emergency phone number that our customers may need for after-hours service. This is a 24/7/365 responsibility. This duty is usually a rotational responsibility shared by each branch's counter staff. The emergency customer simply calls the branch main number. The Allworx system automatically knows to route this afterhours call to a designated cell phone number*.

Since participating employees use their own cell phones, the branch manager is responsible for communicating the cell phone number change needed prior to the evening when it goes into effect. The administrator in charge of the Allworx system then enters this number into a designated field in the Allworx server. There is no ability to log this change in advance so the change must be performed on the day the employee rotation is to go into effect.

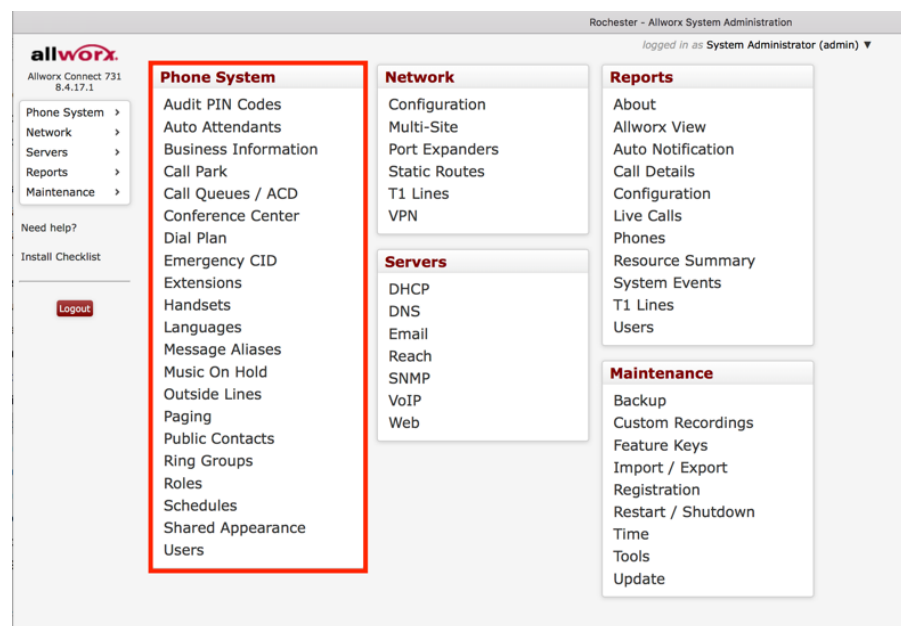

Note: There is a system server for each branch. The employee cell phone number being changed can only be updated in the server associated with the branch where the employee works.

Procedure:

- 1) Log into the appropriate Allworx system server Home page (the user must have administrator credentials):

Rochester URL: <https://72.45.184.30:8443>

Syracuse URL: <https://72.43.59.118:8443>

Lyons

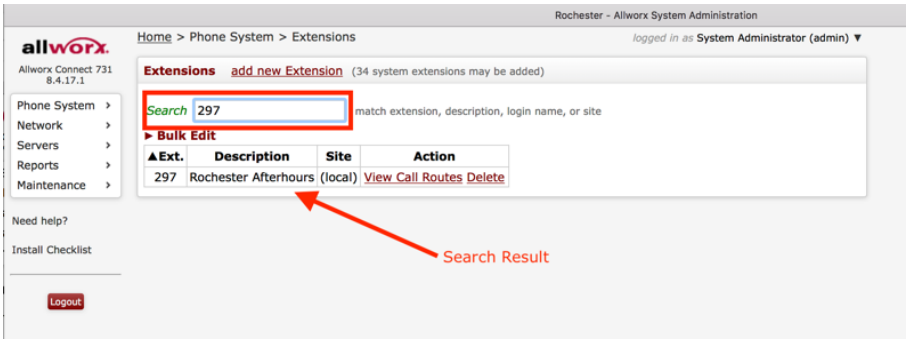

Changing After-hours Call Number - continued

5) 'Call Routes' - Select [Modify](#)

6) Enter the correct after-hours phone number in the space labeled 'Dial number'.

(Note: You may need to highlight and erase any previous number that may be in this field. Be sure to prefix the new number you enter with a "9 1". Entering dashes or parentheses between the numbers is optional, but not required. The system will self-correct.)

7) After entering the new phone number select 'Update'.

8) When done with the change, select 'Logout'.
