Overview

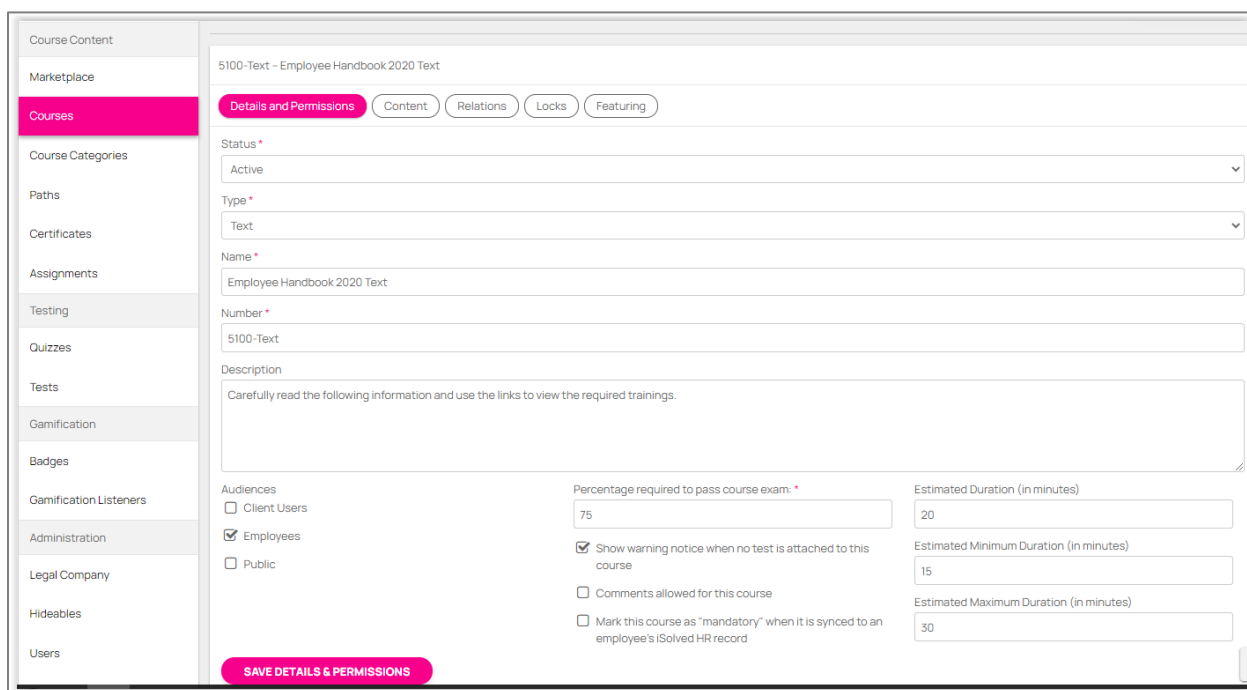

Learn and Grow has added new course types that will allow Learn and Grow client administrators more options when creating custom courses.

Creating a Course Using the Text Type Option

This is a simple course format allowing client admins to write their content directly without needing to create a PowerPoint or PDF ahead of time. Course content can be written directly into a text field in the course editor and it can even contain links to external training from other providers/websites. Great for official state-provided compliance courses that link to external state website content.

Navigate to Classroom Admin > **Courses**.

- **Status:** Allows you to make a course inactive so that no users can view the course going forward, but still store the content for reporting purposes.
- **Type:** Allows you to select the type of course you are creating. Select "Text."

The screenshot shows the 'Details and Permissions' tab for a course. The course title is '5100-Text - Employee Handbook 2020 Text'. The status is set to 'Active' and the type is 'Text'. The name is 'Employee Handbook 2020 Text' and the number is '5100-Text'. The description is 'Carefully read the following information and use the links to view the required trainings.' The audiences are 'Client Users' (unchecked) and 'Employees' (checked). The percentage required to pass the course exam is 75%. The estimated duration is 20 minutes, with a minimum of 15 minutes and a maximum of 30 minutes. The 'Show warning notice when no test is attached to this course' checkbox is checked. The 'Comments allowed for this course' checkbox is unchecked. The 'Mark this course as "mandatory" when it is synced to an employee's I solved HR record' checkbox is unchecked. A 'SAVE DETAILS & PERMISSIONS' button is at the bottom.

- **Name:** The name of the course is displayed for all target audiences.
- **Number:** The number is the unique identifier for the course, and will determine the sort order on the My Classroom "Courses" link.
- **Description:** Allows users to know a little about the course they are about to take.

Help Docs

- **Audiences:** Allows you to determine who should have access to this particular course. The options are:
 - **Client User:** This makes the course viewable only to those that have client admin access in isolated.
 - **Employees:** This makes the course viewable to the isolated users that have an active employee self-service login.
 - **Public:** This makes the course available to both the Client User as well as the Employee audiences. Flagging public does not allow this course to be viewed by individuals that are not in the isolated system. They must be in isolated to access the course.
- **Percentage required to pass course exam:** This option is used if you are going to have a test attached to this course. The system defaults to 75%, but it allows you to configure the passing rate for each course's final text.
- **Show warning notice when no test is attached to course:** By default, the Learn and Grow platform is expecting a test to be attached to each course created. If, by chance, you forget to attach a test, the system will display the following warning:

"The final exam for the course has not been created."

You can remove that warning by removing the checkbox in this field, as we understand that not all courses need to have a test applied.

- **Comments allowed for this course:** This option gives you the ability to allow comments to be added by users viewing the content, and have them attached to the bottom of the course for all users to see.
- **Mark this course as "mandatory" when it is synced to an employee's isolated HR record:** As user's complete a course, the course completion will automatically add the completion information to isolated > Employee Self-Service > Training section. If this box is flagged, the system will also flag a box in Employee Self Service > Training indicating that this was a "mandatory" training.
- **Estimated Duration (in minutes):** Allows you to key in the estimated time it will take to finish the course completely.
- **Estimated Minimum Duration (in minutes):** Allows you to key in the estimated minimum time.
- **Estimated Maximum Duration (in minutes):** Allows you to key in the estimated maximum time.

When you click on the **Save Details & Permissions** icon, additional tabs appear at the top of the screen.

Content Tab

The next tab is **Content** where you will key in or copy/paste the text you want displayed as the course. This can even include links to external training from other providers.

- **Title:** Key in the title of this section.
- **Content:** Key in or copy/paste the content for this course. Use the  icon to insert a link.
 - **URL:** Paste in the appropriate URL.
 - **Text to display:** Key in the name that you want your users to see for the link.
 - **Title:** Key in a descriptive title (this will display for users that hover over the link or use low-vision accessibility software like screen-readers).
 - **Target:** Select "none" or "new window." "None" opens the link in the existing tab. Selecting "new window" will open it in a new tab (or window depending on the viewer's browser settings).
- **Add Section:** Adds another section to allow you to create more than one, if needed. If using more than one section, can re-arrange the order of the sections by using  at the top of each section.

- Save Content when finished.

Relations Tab

The next tab is **Relations**, which allows you to tie prerequisite and suggested courses to your current course. You can also tie your course to a custom path.

- Prerequisites:** This field allows you to require that courses be taken in a certain order. Users will not be able to take the final exam for a course if they have not completed the prerequisites.
Note: Select courses from the **Recently Updated Courses** or key part of the course name in the space provided to have the system narrow the search for the desired course.
- Suggested Courses:** This field allows you to apply courses that might pair well with the current course content. Suggested courses are not required, but could be beneficial for the user to watch to follow along with the current content.
Note: Select courses from the **Recently Updated Courses** or key part of the course name in the space provided to have the system narrow the search for the desired course.
- Paths:** If you have created a Path that you would like this course to be included, key in the name of the Path here and select it to include this course in the selected Path.
- Teams:** If you have created teams within Learn, you are able to select a team(s) here. This will make this course only viewable to the members of the selected team(s).

Click on the **Save Relations** button when finished.

SELECT ALL

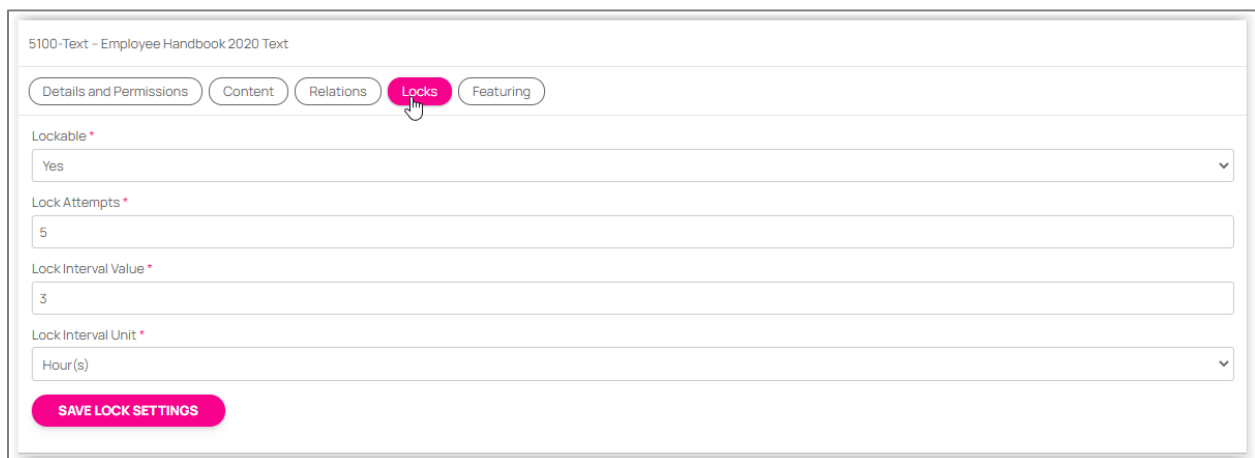

Locks Tab

Locks allows you to determine if you would like to lock a user out after failing a test a certain number of times. If you choose to set up a lock for your course, you will change the field labeled **Lockable** to "Yes" and determine the lock parameters.

- **Lockable:** Select "Yes" or "No" in this field. If you have the option set to "No," the options below will not be displayed.
- **Lock Attempts:** Enter in the number of attempts you would like an employee to have before being locked out.
- **Lock Interval Value:** Set a value you would like to use for how long an employee will be locked out. An example could be "1" for one day.
- **Lock Interval Unit:** Select the Lock Interval unit from the drop-down menu. The options are Hour(s), Day(s), Week(s), Month(s), Year(s), and Indefinite.

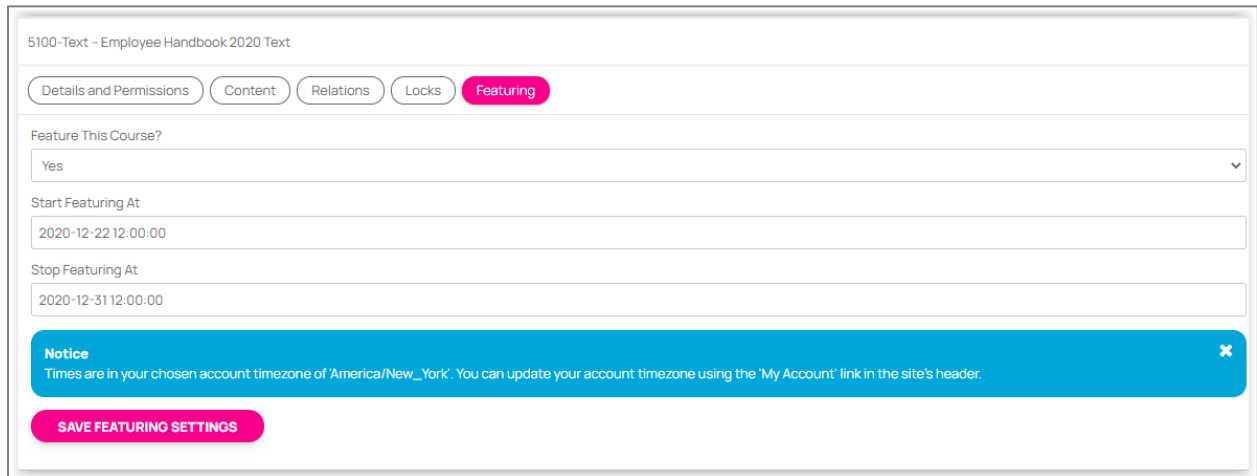

Click on the **Save Lock Settings** button when you have filled out all areas of the screen to save.

Help Docs

Featuring Tab

Feature the Course: This option allows you to bump a course up to the top of the **Courses** page. This is beneficial for any new content that you want to call attention to. If you choose to feature the course, select "Yes" in the **Feature this Course** field. Select the appropriate Start and Stop Featuring date.

The screenshot shows the 'Featuring' tab selected in a course management interface. The course title is '5100-Text - Employee Handbook 2020 Text'. The tabs are 'Details and Permissions', 'Content', 'Relations', 'Locks', and 'Featuring'. The 'Featuring' tab contains the following fields:

- Feature This Course?**: A dropdown menu with 'Yes' selected.
- Start Featuring At**: A date and time field showing '2020-12-22 12:00:00'.
- Stop Featuring At**: A date and time field showing '2020-12-31 12:00:00'.

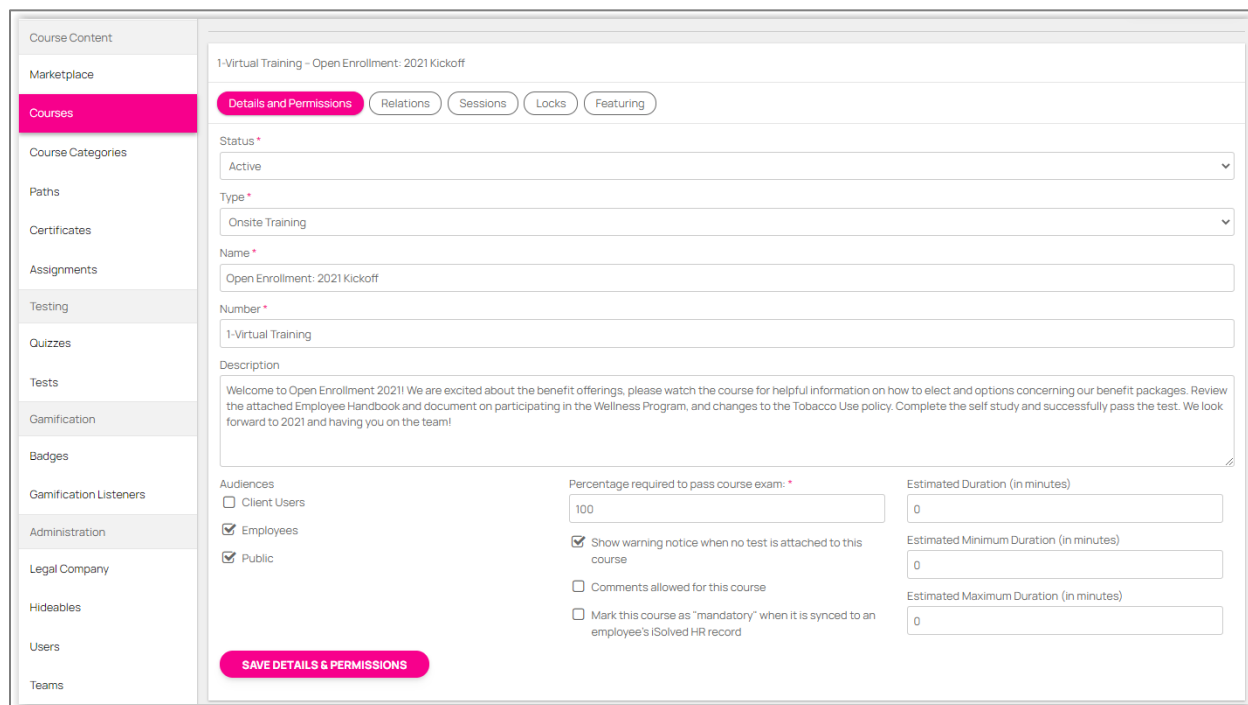

Below these fields is a blue notice bar with a close button (X) that reads: "Notice: Times are in your chosen account timezone of 'America/New_York'. You can update your account timezone using the 'My Account' link in the site's header." At the bottom of the tab is a pink button labeled 'SAVE FEATURING SETTINGS'.

Creating a Course Using the Onsite Course Type Option

This allows a client admin to create onsite or virtual session courses that their employees can register for and attend, utilizing all of the existing built-in functionality within isoloved I Learn, such as prerequisites, paths, certificates, self-studies, tests, etc.

Navigate to Classroom Admin > **Courses**.

- **Status:** Allows you to make a course inactive so that no users can view the course going forward, but still store the content for reporting purposes.
- **Type:** Allows you to select the type of course you are creating. Select "Onsite Training."

- **Name:** The name of the course is displayed for all target audiences.
- **Number:** The number is the unique identifier for the course, and will determine the sort order on the My Classroom "Courses" link.
- **Description:** Allows users to know a little about the course they are about to watch.
- **Audiences:** Allows you to determine who should have access to this particular course. The options are:
 - **Client User:** Makes this course viewable only to those that have client admin access in isolved.
 - **Employees:** Makes this course viewable to the isolved Users that have an active employee self-service login.
 - **Public:** Make the course available to both the Client User as well as the Employee audiences. Flagging public does not allow this course to be viewed by individuals that are not in the isolved system. They must be in isolved to access the course.
- **Percentage required to pass course exam:** This option is used if you are going to have a test attached to this course. The system defaults to 75%, but it allows you to configure the passing rate for each course's final text.
- **Show warning notice when no test is attached to course:** By default, the isolved I Learn platform is expecting a test to be attached to each course created. If, by chance, you forget to attach a test, the system will display the following warning:

"The final exam for the course has not been created."

You can remove that warning by removing the checkbox in this field, as we understand that not all courses need to have a test applied.

- **Comments allowed for this course:** This option gives you the ability to allow comments to be added by users viewing the content, and have them attached to the bottom of the course for all users to see.

Help Docs

- **Mark this course as "mandatory" when it is synced to an employee's isolated HR record:** As user's complete a course, the course completion will automatically add the completion information to isolated > Employee Self-Service > Training section. If this box is flagged, the system will also flag a box in Employee Self Service > Training indicating that this was a "mandatory" training.
- **Estimated Duration (in minutes):** Allows you to key in the estimated time it will take to finish the course completely.
- **Estimated Minimum Duration (in minutes):** Allows you to key in the estimated minimum time.
- **Estimated Maximum Duration (in minutes):** Allows you to key in the estimated maximum time.
- When you click on the **Save Details & Permissions** icon, additional tabs appear at the top of the screen.

Select **Sessions** and **Create Session**.

- **Status:** Select the appropriate status from:
 - **Open:** Users are able to register.
 - **Closed:** Users are no longer able to register (i.e. session is full).
 - **Draft:** Used to save changes made to the session until you are ready for users to have access to it.
- **Max Attendees:** Key in the Maximum desired attendees. This is a "soft value," meaning that the session will not automatically close itself when the maximum number of attendees have registered. Instead, you will receive an email when the session is full, and you will have the option to manually close the session if desired.
- **Starts At:** Select the appropriate date and time this session will start. This is not the date range when you want the registration to be available.
- **Ends At:** Select the appropriate date and time of this session will end. This is not the date range when you want the registration to be available.

Template Options

Select from "Onsite" or "Virtual."

- If "Virtual" is selected, **Hero Image** will appear for you to upload an image. This image will display as a background behind the session title when your users are viewing the session details. This field is optional as a default image will display if no image is provided. We recommend not placing text in this image as it may get cut off on various display sizes.
 - **What do attendees need to know?:** Key in any information that would help the user be ready for the session.
 - **Agenda:** Click to upload your PDF agenda.
 - Select **View Agenda** to view the document you have selected to attach.
 - **External URL:** Copy/paste the URL used for the session, where the registrants need to go to view the session. This will be included as the Event Link. If you use a third-party meeting service like WebEx, Zoom, or GoToMeeting, then this is where you will provide a URL to a meeting or event that you have created in that third-party service.
 - **Notes:** Key in any notes that may be helpful.
- If "Onsite" is selected, **Location** field will appear for you to add the location of the session.
- **Timezone:** Select the appropriate option for the desired timezone.
- **Content:** Allows you to key in text or include documents and images that you have added to the Library Admin section.

Help Docs

- **Registrations:** Shows those that have registered for the course. Select a User to:
 - Change their status from "Pending" to "Confirmed," "Denied," or "Cancelled."
 - **Note:** When changing a user to "Confirmed," you are able to select  to award 5 points to that user. Or select  to deduct 5 points if you gave points in error.
 - View or edit the name, email address, phone, job title, and company name they submitted.
 - Add any comments, if needed.
 - Select if they have food allergies. If yes is selected, a box will display for food allergy details.

Alerts

Allows you to create an alert to display at the top or bottom of the registration form fields.

- **Type:** Select the appropriate type from Default (Grey), Info (Blue), Success (Green), Warning (Yellow) or Danger (Red) to have the message box display in that color.
- **Header:** Key in the header of the notification.
- **Content:** Key in what you want the registrant to know.
- **Position:** Select from Before registration form or After registration form to determine when the user would see this alert content.
- **Add New Alert:** Select this to create another alert.
