

Important Facts Regarding Your Authorization to Share Protected Health Information

- In order to comply with Federal HIPAA regulations health plans must obtain a member's permission to share his/her protected health information with any other person. There are limited exceptions to this.
- As permitted by law, we will continue to communicate to providers of care involved in your treatment: (1) our payment activities in connection with your claims, (2) your enrollment in our health plan and (3) your eligibility for benefits.
- Until a child reaches age 18, parents may access most of their child's health information without first obtaining the child's permission. However, regardless of the child's age, parents do not have access to diagnosis or treatment information for sexually transmitted diseases, abortion, and drug or alcohol abuse unless the child specifically authorizes the release of such information.
- This form is used to authorize us to share your protected health information. Each person you identify will have the same access to your information. If you would like each person to access *different* information or to have access to your information for a *different* period of time, you'll need to complete separate forms for each individual or time period.
- We will NOT disclose information relating to genetic testing, alcohol and drug abuse, mental health, abortion, and sexually transmitted disease information unless you check the corresponding box in Part D. If you would like to authorize us to release information regarding HIV/AIDS, New York State requires that a different form be completed. To obtain a copy of this form, please contact our office at the telephone number listed on your identification card, or access the form at the following website:
<http://www.health.state.ny.us/diseases/aids/forms/informedconsent.htm>.
- If you need additional forms, you may copy this form, contact our office at the telephone number listed on your identification card or visit our Web site at:
