Introduction

Every employable person will match some positions better than other positions. This report provides information about Connie Syron presented in a manner to help you understand how she matches with this selected position within your organization.

This report reflects the responses provided by Connie Syron when she completed the **ProfileXT** assessment. The result for each characteristic is illustrated on a scale from 1 to 10. The darker area on each scale represents the best Performance Model for the position. The enlarged segment of the scale shows where Connie scored. If the enlarged segment is dark, Connie is in the Performance model. If it is lighter, she is not. Information about Connie is reported in these four categories:

- **Profile for Thinking Style** - Learning Index, Verbal Skill, Verbal Reasoning, Numerical Ability, and Numeric Reasoning.
- **Profile for Behavioral Traits** – Energy Level, Assertiveness, Sociability, Manageability, Attitude, Decisiveness, Accommodating, Independence, and Objective Judgment.
- **Profile for Interests** - Enterprising, Financial/Administrative, People Service, Technical, Mechanical, and Creative.
- **The Total Person & Management Considerations** - Description of Connie as a person and how to most effectively maximize her potential.

Note: Additional considerations are displayed when Connie falls outside your Performance Model.

If Connie is being considered for this position and her results fall outside the Performance Model, you should print the companion Interview Guide for Connie. This Guide provides appropriate interview questions for each instance where Connie is outside the model. These interview questions will guide the interviewer in exploring important areas where information from the interview will effectively assist the interviewer in making an informed decision about her placement.

Please consult the User's Guide for additional information on using these results when working with Connie. As discussed in the User's Guide for this product, the results from this or any assessment should never make up more than a third of the final decision in placements.

Profile for Thinking Style

When viewing the scales on this page and the next, the darker shading represents the Job Performance Model for the role of Controller. The larger box indicates the individual's score.

Learning Index

An index of expected learning, reasoning, and problem solving potential.

Verbal Skill

A measure of verbal skill through vocabulary.

Verbal Reasoning

Using words as a basis in reasoning and problem solving.

Numerical Ability

A measure of numeric calculation ability.

Numeric Reasoning

Using numbers as a basis in reasoning and problem solving.

Profile for Behavioral Traits

Energy Level

Tendency to display endurance and capacity for a fast pace.

Assertiveness

Tendency to take charge of people and situations. Leads more than follows.

Sociability

Tendency to be outgoing, people-oriented, and participate with others.

Manageability

Tendency to follow policies, accept external controls and supervision, and work within the rules.

Attitude

Tendency to have a positive attitude regarding people and outcomes.

Decisiveness

Uses available information to make decisions quickly.

Accommodating

Tendency to be friendly, cooperative, agreeable. To be a team person.

Independence

Tendency to be self-reliant, self-directed, to take independent action, and make own decisions.

Objective Judgment

The ability to think clearly and be objective in decision-making.

Distortion for this assessment is within the acceptable range.

Profile for Interests

The Interests section assesses the relative interests between the six interest areas: Enterprising, Financial/Administrative, People Service, Technical, Mechanical, and Creative. For the Job Match Performance Model of Controller, the top three interests, presented in order, are Enterprising, Financial/Administrative, and People Service. The top three interests for Connie are Financial/Administrative, People Service, and Technical. Ms. Syron shares two of these interest areas: Financial/Administrative and People Service.

Top Interests for Connie Syron

Financial/Administrative

Indicates interest in activities such as organizing information or business procedures.

People Service

Indicates interest in activities such as helping people and promoting the welfare of others.

Technical

Indicates interest in scientific activities, technical data, and research.

Top Interests for this Performance Model

Enterprising

Indicates interest in activities associated with persuading others, sales, and presenting ideas.

Financial/Administrative

People Service

 = Match

The Total Person

This part of the report discusses the results for Connie Syron on each of the scales in all three sections. The Behavioral and Management Considerations for each scale relate to her scores without reference to the Controller model. If her score falls outside the model for a particular scale, Additional Considerations will be listed as suggestions to help Connie Syron adapt her behavior to better fit the job.

Learning Index

An index of expected learning, reasoning, and problem solving potential.

Behavioral Considerations

- Her assimilation of new information will be better than most individuals in the general population.
- Connie generally learns new information best by applying it.
- Ms. Syron handles fairly complex tasks with relative efficiency.
- Ms. Syron is an effective learner in most situations.

Management Considerations

- Encourage her input in business discussions as she is inclined to apply any information learned to problem solving. However, consider the effectiveness of her communication of ideas to others, as she may talk over the heads of some people.
- In the training experience, she may initially excel, but a drop in performance can set in if the experience is not sufficiently challenging. A self-paced training program that adapts to the abilities of each participant will not only challenge her, but also make efficient use of her training time.
- Ms. Syron is highly responsive to training at many levels of complexity. However, this efficient pattern of assimilating information can be the cause of frustration for her if there is little challenge in the training process. Maintain challenging opportunities in training so that she may achieve even higher goals.
- Connie will attain skills readily when provided training. Offer a challenging training experience to avoid boredom. Adapt the training experience so that high achievers are rewarded with early dismissal or granted extra duties to achieve higher success ratings.

Verbal Skill

A measure of verbal skill through vocabulary.

Behavioral Considerations

- Ms. Syron excels in a job that requires strong vocabulary skills in order to make correct decisions.
- Ms. Syron is able to use a diverse vocabulary.
- Connie is capable of precise vocabulary usage even under the pressure of strict time constraints.
- Her understanding of verbal communication should be sharp and on target.

Management Considerations

- While capable of assimilating most verbal information well, provide Connie with feedback concerning her ability to make that information understandable to workers of all verbal skill levels.
- If she appears frustrated with the level of verbal ability of the majority of her peers, encourage a more facilitative attitude that adapts to the needs of others.
- Although capable of expressing herself with an advanced vocabulary, suggest actively listening to others so that she may communicate at the appropriate level.
- Ms. Syron has a high level of verbal skills. Monitor her performance in this area, giving feedback and examples of adaptive communication styles that speak to the level of others.

Additional Considerations

On the Verbal Skill scale Ms. Syron is above the designated Performance Model for this position. This suggests that her command of vocabulary is greater than the position typically requires and that she may experience frustration when communicating with co-workers. Discussions with her should explore the possibility the position may not be sufficiently challenging to maintain her interest and/or level of performance.

Verbal Reasoning

Using words as a basis in reasoning and problem solving.

Behavioral Considerations

- She likely prefers to work with verbal information.
- Ms. Syron should communicate thoughts and ideas to others effectively.
- Connie is proficient in information gathering and expression of thoughts and ideas.
- Ms. Syron assimilates verbal information fairly rapidly when compared to the general population.

Management Considerations

- If she experiences frustration in expressing ideas to others, suggest that she say it in plain English or make her meaning more clear. Provide training as needed in adaptive communication.
- Proficient in verbal reasoning, Ms. Syron will work best when her verbal acumen is put to use.
- Depending on the audience, Ms. Syron may become frustrated by the attempts of others to understand her somewhat complex verbal information. Provide your advice in how to communicate ideas in a manner consistent with the verbal level of others with whom she interacts.
- While capable of processing verbal information and making decisions based on that information, be aware of any frustration Connie may experience when communicating with others of different ability levels. Coach her on appropriate techniques that can facilitate understanding by others.

Numerical Ability

A measure of numeric calculation ability.

Behavioral Considerations

- Connie shows strong potential for developing existing skills with numbers.
- Ms. Syron has a sound understanding of basic mathematical processes and is able to mentally figure some numeric combinations.
- Ms. Syron can generally be expected to accurately perform job-related numerical calculations.
- She should be competent working with numerical data.

Management Considerations

- Proficient in numerical calculation, Ms. Syron should have little difficulty in her duties, but observe the potential for downward trends in motivation, if she requires a challenge in this area.
- In calculating complex data, Connie will be proficient, but may experience frustration if unable to convey this information to others of lesser ability.
- She may express frustration with those who are not as proficient in processing numerical information. Pay attention to her feelings, but relate the necessity of being understanding of others.
- Ms. Syron will make decisions based on numerical information with sufficient accuracy and speed. However, it may be necessary to observe her level of patience with peers, due to the fact that her proficiency may be higher than others.

Numeric Reasoning

Using numbers as a basis in reasoning and problem solving.

Behavioral Considerations

- Ms. Syron demonstrates a relatively strong ability to solve problems of a numerical nature.
- Ms. Syron works well with numbers and numerical concepts.
- Connie grasps numerical concepts readily.
- She completes numerical problems with greater success than the general population.

Management Considerations

- Ms. Syron is more proficient in processing numerical information than most people. She may experience frustration if not sufficiently challenged, and may be willing to take on extra duties that allow her to practice this skill.
- To avoid miscommunications when Connie is expressing numerical information, coach her on proper communication techniques that emphasize a common level of expression as needed.
- Connie is adept at seeing the relationship between numerical data and decision making. She may however, require extra challenges if not provided by the job to avoid a loss of motivation.
- Ms. Syron is capable of assimilating data to make decisions, but may occasionally be frustrated by a lack of challenge in this area. Address frustrations and provide ways to challenge her abilities.

Energy Level

Tendency to display endurance and capacity for a fast pace.

Behavioral Considerations

- Connie will require clearly defined priorities and deadlines as well as some external urging and motivation.
- Ms. Syron typically doesn't show a high sense of urgency. She might need help getting started on new assignments.
- She prefers not to be pressured by critical deadlines and may need time to think things through.
- Ms. Syron may be more patient and better at working with methodical processes.

Management Considerations

- Connie is likely to lose focus on long-term projects. Provide ways for her to re-energize during periods of hard work. By organizing her time, she can allow short breaks to gather her motivational reserves and reflect on short-term accomplishments while maintaining a steady pace to meet daily goals.
- Ms. Syron requires the assistance of her supervisor to focus on long-term projects. Provide thorough supervision and set daily goals for timely results. Provide encouragement along the way.
- Ms. Syron may not respond well to the stress of strict deadlines. Maintain open communication during high stress periods and provide coaching in proven methods for handling stress.
- She may place a high priority on personal time over work time. Reward her efforts to do whatever it takes to get the job done by providing opportunities for self-motivation during non-peak periods of work.

Additional Considerations

On the Energy Level scale Ms. Syron is below the designated Performance Model for this position. This suggests that her capacity to endure hard work is less than the position typically requires and that she could have a problem with the high demands of this job. Discussions with her should explore the possibility that for Ms. Syron the energy required for this position may be above what she is willing to exert.

Assertiveness

Tendency to take charge of people and situations. Leads more than follows.

Behavioral Considerations

- Ms. Syron prefers not to take action without having the time and opportunity to process information pertaining to the situation. She prefers to wait for specific instructions before taking action.
- She does not usually need to steer the course of what is happening or the direction of events.
- Ms. Syron tends to work hard for a leader and a cause.
- Connie may be slow to assert herself, enforce company policies and act with authority. She will be slow to make unpopular decisions when necessary.

Management Considerations

- Casually engage Ms. Syron in discussions to help foster assertiveness. It may be necessary to provide an example as part of your leadership. Make her feel a part of the team and encourage others to do the same.
- Provide feedback and reward her involvement whenever possible. By repeating interactive exercises, she can gain greater interpersonal skills. Advise her often in her progress.
- Be observant of when Connie may be willing to contribute verbally to group processes. Foster this willingness by encouraging her participation. Listen patiently and provide feedback often to guide her toward being more assertive.
- Encouraging Ms. Syron to offer input in group discussions can enhance her confidence if applied consistently over time. If necessary, assertiveness training will be effective if any improvement is recognized by management.

Additional Considerations

On the Assertiveness scale, Ms. Syron scored below the Performance Model for this position. She could find the requirements of a strong presence to be overly challenging. Determine her willingness to enhance her confidence and leadership skills in the future.

Sociability

Tendency to be outgoing, people-oriented, and participate with others.

Behavioral Considerations

- Connie prefers a reserved, impersonal and business-like approach to doing business.
- Ms. Syron may be slow to promote the benefits of teamwork and to involve the team in the discussion about how things will be done.
- She may avoid assignments that require a high degree of interpersonal contact and interaction with others.
- Ms. Syron expresses a low interest in the opportunity to entertain people or establish a network of contacts.

Management Considerations

- Should you need to engage her participation, give her assignments that require teamwork, beginning with relatively easy tasks. Reward her successes (and near-successes, at first), eventually decreasing the rewards over time.
- If it becomes necessary to decrease her tendency to isolate herself, provide opportunities for her to work in small groups. As time passes and her comfort level improves, get her involved with larger groups, or possibly group leadership, if she responds well.
- Her cool and "business-like" exterior may frustrate others with whom Connie works. Her team and team leaders could encourage her to become more engaged in the group dynamic. Reward the team as a unit for improvement in their overall cooperation.
- Ms. Syron may display frustration in social situations at work. She prefers to focus on the task at hand rather than on the interpersonal elements of work. If this becomes an issue, redirect this tendency by engaging and encouraging her in the social elements of the job.

Additional Considerations

On the Sociability scale Ms. Syron is below the designated Performance Model for this position. This suggests that her willingness to work within a team environment is low. Discussions with her should explore the possibility that for Ms. Syron, the challenge of a cooperative climate may lead to frustration.

Manageability

Tendency to follow policies, accept external controls and supervision, and work within the rules.

Behavioral Considerations

- She is generally accepting of organizational constraints and restrictions.
- Connie readily accepts authority and rules with a cooperative and friendly interpersonal style.
- Her respect for authority typically drives her to follow rules and abide by policies.
- Ms. Syron is highly cooperative, agreeable and quite willing to accept supervision and external controls.

Management Considerations

- Ms. Syron demonstrates a preference for procedural methods and following strict policies. Should a more flexible approach be required, encourage it by assigning projects that rely on initiative and creative problem solving.
- Connie may expect her supervisors to provide clearly stated guidelines for her behavior and task management. If necessary, encourage creativity and flexibility, possibly assigning her to a co-worker who shows more self-reliance.
- If it becomes necessary to encourage Connie to develop creative ways to solve problems and complete tasks, assign projects that require her to work outside of procedural norms. She may be uncomfortable in unstructured environments and you must foster a willingness to work outside the box. Provide positive feedback for her efforts to develop her confidence in this area.
- Connie may experience frustration if required to work in an unstructured environment. Encourage her to maintain open communication with you or other team members in order to foster her flexibility.

Attitude

Tendency to have a positive attitude regarding people and outcomes.

Behavioral Considerations

- Her attitude is highly compatible with confronting interpersonal problems and frustrations.
- Ms. Syron demonstrates a highly positive attitude concerning risk, change and unexpected challenges.
- Ms. Syron has a highly positive attitude regarding changes in policies and procedures.
- She has a highly positive attitude regarding the intentions of others.

Management Considerations

- Her faith in the results of some projects may tend to be overly optimistic allowing mistakes and unforeseen conflicts to occur. Training in logical and evaluative reasoning may provide Connie with the ability to use better judgment and forecast potential hazards more appropriately.
- Ms. Syron may appear overly optimistic and positive about the motivations of others. If it becomes necessary to help develop a more realistic attitude concerning competition, encourage her to observe her more successful co-workers and offer an opportunity to discuss the differences with you.
- Ms. Syron has an optimistic regard for the motivations of others and may not be careful enough in her appraisal of others. If this becomes a problem, encourage discerning evaluative skills so that she may approach dealings with others with more prudence and confidence.
- Connie appears to have a very high level of trust and optimism. Training in more prudent assessment of the motivations of others may help enhance her quality of work if needed.

Additional Considerations

On the Attitude scale Ms. Syron is above the designated Performance Model for this position. This suggests that her tendency will be to express an overly optimistic attitude compared to successful individuals in this position. Discussions with her should explore the possibility that she will encounter frustration by the nature of this work.

Decisiveness

Uses available information to make decisions quickly.

Behavioral Considerations

- She will usually be cautious and methodical in her decision making process.
- Ms. Syron tends to be cautious, preferring to wait for more information and advice before taking action.
- Ms. Syron may be slow to act with a sense of urgency when confronted with a problem.
- Connie is sometimes cautious about making decisions that arise in day to day situations.

Management Considerations

- To develop greater decisiveness, provide training in risk management as well as how to handle stress. This should improve her ability to make timely decisions.
- If low decisiveness becomes an issue, build her enthusiasm to take action by example of your own capacity to act with a sense of urgency.
- Ms. Syron tends to make decisions slowly and carefully. If more urgent action is needed, emphasize the importance of deadlines and making decisions without extended analysis.
- You may need to remind her of the value of taking risks if more timely decisions are required. Build this risk acceptance by providing low risk situations, then building the potential for risk as she adapts.

Additional Considerations

On the Decisiveness scale Ms. Syron is below the designated Performance Model for this position. This suggests that she may respond more deliberately when making decisions than the position typically requires and that she could lack a sense of urgency. Discussions with her might explore the possibility that Ms. Syron may be frustrated with the need for fast-paced decision-making.

Accommodating

Tendency to be friendly, cooperative, agreeable. To be a team person.

Behavioral Considerations

- Ms. Syron is committed to reducing conflict and establishing cooperation. She is comfortable working as part of a team and sharing ideas and information.
- She is highly motivated by an informal, positive and relaxed work environment.
- Connie tends to minimize serious problems and negative information. She will seek solutions which are acceptable to everyone.
- Ms. Syron is quick to accommodate others to avoid interpersonal conflict.

Management Considerations

- She may not respond well to an aggressive style of leadership. Training that educates her to stand up for her ideas may enhance her motivation to achieve individual success.
- Connie wishes to please others and may be frustrated by a less accommodating environment. If this becomes an issue, demonstrate the advantages of individual thinking, to help her understand that the willingness to challenge the ideas of others can be an important part of reaching team goals.
- If it becomes necessary to confront her apparent hesitance to challenge the ideas of coworkers, reward her efforts to act aggressively. Publicly recognize her improvements when she stands up for her unique ideas or solutions.
- Her cooperative style may result in poor output if she goes along just to get along. If this becomes an issue, instill a competitive climate that rewards individual success, while remaining sensitive to her needs for a sense of belonging in the department.

Additional Considerations

On the Accommodating scale Ms. Syron is above the designated Performance Model for this position. This suggests that her willingness to productively challenge the opinions of others is less than the position typically requires and that this could cause a problem. Discussions with her should explore the possibility the position may require a more direct style than is usual for her.

Independence

Tendency to be self-reliant, self-directed, to take independent action, and make own decisions.

Behavioral Considerations

- Connie is usually satisfied with the status quo. She is comfortable working within the system.
- She generally prefers to follow established procedures.
- Ms. Syron is willing to function in a coordinated, interrelated way, participating in group decision making.
- Ms. Syron is comfortable with the normal restraints of organizational life.

Management Considerations

- Under the pressure of deadlines or other stresses, Ms. Syron may seek out your guidance. Provide moderate supervision, but encourage self-reliance when appropriate. Possible responses may include offering your attention only after some effort is made by her to make her own decisions.
- Connie appreciates the structure of regular procedures and close supervision. To improve self-reliance, if desired, encourage her to create her own procedures for getting the job done.
- If it becomes necessary to counter her tendency to follow predictable patterns, provide a less structured work environment followed with support and feedback so as to foster greater independence.
- There may be a tendency for Connie to hesitate when more resourceful action is required. Training in creative problem solving will allow her to perform in a more productive manner.

Additional Considerations

Ms. Syron achieved an Independence score outside the designated Performance Model for this position. This suggests her level of resourcefulness is different than the position typically requires but that she should not have a problem making decisions on her own. Discussions with her should explore the possibility that for Ms. Syron the position may be frustrating under more stressful conditions.

Objective Judgment

The ability to think clearly and be objective in decision-making.

Behavioral Considerations

- Ms. Syron sometimes favors subjective thinking when making decisions.
- Connie uses judgment that is compatible with concrete situations and tangible data.
- Ms. Syron has a judgment style that works well with routine problems and decisions.
- When pressured, Ms. Syron reaches conclusions that may tend to be inconsistent.

Management Considerations

- When fast decisions must be made, Connie is able to rely on intuition. Training should focus on assimilating a thorough collection of the necessary information, even if on a deadline, so that she can make timely and objective decisions.
- Provide training that allows Ms. Syron to identify the potential sources of bias that occur in day to day decision-making. Give feedback when needed so that she can track her progress and adjust her techniques.
- When necessary, coach her on how to discern useful information from a mass of input so that timely decisions can be made emphasizing the facts and not assumptions.
- On occasion, Ms. Syron may become frustrated when required to apply hard facts to her decision making process. Encourage her to take the time to review all the information before coming to a decision. In time, this practice will become easier and more efficient.

Additional Considerations

Ms. Syron achieved a Judgment score that is outside the designated profile for this Performance Model. This suggests that her objectivity in making decisions is different than the position typically requires. Discussions with her should explore the possibility that for Ms. Syron, the position may require greater practicality and could lead to a reduction in her level of performance.

Interests

The Interests section assesses the relative interests between the six interest areas. The top three interests for Connie and the Performance Model are presented below in ranked order. The interests shared by both are circled.

Top Interests for Connie Syron

Financial/Administrative

Indicates interest in activities such as organizing information or business procedures.

People Service

Indicates interest in activities such as helping people and promoting the welfare of others.

Technical

Indicates interest in scientific activities, technical data, and research.

Top Interests for this Performance Model

Enterprising

Indicates interest in activities associated with persuading others, sales, and presenting ideas.

Financial/Administrative

People Service

 = Match

Her interests are focused in the administrative and technical aspects of work. She demonstrates an interest in the Financial, People Service and Technical themes. This pattern is consistent with people who like to work in a fairly structured setting, especially in which there is a definable chain of command and there are typical office practices to be dealt with. The preferred work environment is usually defined by a focus on interpersonal dynamics and helping clients, especially with technical information from a consultative/expert point of view.

With Financial/Administrative as her primary area of interest, Ms. Syron is likely to seek out activities that involve organizing or otherwise dealing with budgets, information and/or supplies. Her primary focus and source of motivation is in classifying and managing information.

Secondly, she is motivated by the interaction with others that comes with service to an interpersonal cause as demonstrated by her interest in People Service activities. Helping others or providing them with services may help to energize her in what she does at work.

Finally, her interest in Technical activities rounds out her profile. Other interest areas may have more of an effect on her motivation, but her interest in Technical pursuits contributes.

Additional Considerations

Ms. Syron does not show Enterprising activities as one of her top three interest areas. She may not find activities associated with this theme as motivating as those individuals who have been successful in this position.
