Introduction

Every employable person will match some positions better than other positions. This report provides information about Colin McKelvey presented in a manner to help you understand how he matches with this selected position within your organization.

This report reflects the responses provided by Colin McKelvey when he completed the **ProfileXT** assessment. The result for each characteristic is illustrated on a scale from 1 to 10. The darker area on each scale represents the best Performance Model for the position. The enlarged segment of the scale shows where Colin scored. If the enlarged segment is dark, Colin is in the Performance model. If it is lighter, he is not. Information about Colin is reported in these four categories:

- **Profile for Thinking Style** - Learning Index, Verbal Skill, Verbal Reasoning, Numerical Ability, and Numeric Reasoning.
- **Profile for Behavioral Traits** – Energy Level, Assertiveness, Sociability, Manageability, Attitude, Decisiveness, Accommodating, Independence, and Objective Judgment.
- **Profile for Interests** - Enterprising, Financial/Administrative, People Service, Technical, Mechanical, and Creative.
- **The Total Person & Management Considerations** - Description of Colin as a person and how to most effectively maximize his potential.

Note: Additional considerations are displayed when Colin falls outside your Performance Model.

If Colin is being considered for this position and his results fall outside the Performance Model, you should print the companion Interview Guide for Colin. This Guide provides appropriate interview questions for each instance where Colin is outside the model. These interview questions will guide the interviewer in exploring important areas where information from the interview will effectively assist the interviewer in making an informed decision about his placement.

Please consult the User's Guide for additional information on using these results when working with Colin. As discussed in the User's Guide for this product, the results from this or any assessment should never make up more than a third of the final decision in placements.

Profile for Thinking Style

When viewing the scales on this page and the next, the darker shading represents the Job Performance Model for the role of Accounting & Financial Analyst. The larger box indicates the individual's score.

Learning Index

An index of expected learning, reasoning, and problem solving potential.

Verbal Skill

A measure of verbal skill through vocabulary.

Verbal Reasoning

Using words as a basis in reasoning and problem solving.

Numerical Ability

A measure of numeric calculation ability.

Numeric Reasoning

Using numbers as a basis in reasoning and problem solving.

Profile for Behavioral Traits

Energy Level

Tendency to display endurance and capacity for a fast pace.

Assertiveness

Tendency to take charge of people and situations. Leads more than follows.

Sociability

Tendency to be outgoing, people-oriented, and participate with others.

Manageability

Tendency to follow policies, accept external controls and supervision, and work within the rules.

Attitude

Tendency to have a positive attitude regarding people and outcomes.

Decisiveness

Uses available information to make decisions quickly.

Accommodating

Tendency to be friendly, cooperative, agreeable. To be a team person.

Independence

Tendency to be self-reliant, self-directed, to take independent action, and make own decisions.

Objective Judgment

The ability to think clearly and be objective in decision-making.

Distortion for this assessment is within the acceptable range.

Profile for Interests

The Interests section assesses the relative interests between the six interest areas: Enterprising, Financial/Administrative, People Service, Technical, Mechanical, and Creative. For the Job Match Performance Model of Accounting & Financial Analyst, the top three interests, presented in order, are Financial/Administrative, Technical, and Enterprising. The top three interests for Colin are Financial/Administrative, Technical, and Mechanical. Mr. McKelvey shares two of these interest areas: Financial/Administrative and Technical.

Top Interests for Colin McKelvey

Financial/Administrative

Indicates interest in activities such as organizing information or business procedures.

Technical

Indicates interest in scientific activities, technical data, and research.

Mechanical

Indicates interest in working with tools, equipment, and machinery.

 = Match

Top Interests for this Performance Model

Financial/Administrative

Technical

Enterprising

Indicates interest in activities associated with persuading others, sales, and presenting ideas.

The Total Person

This part of the report discusses the results for Colin McKelvey on each of the scales in all three sections. The Behavioral and Management Considerations for each scale relate to his scores without reference to the Accounting & Financial Analyst model. If his score falls outside the model for a particular scale, Additional Considerations will be listed as suggestions to help Colin McKelvey adapt his behavior to better fit the job.

Learning Index

An index of expected learning, reasoning, and problem solving potential.

Behavioral Considerations

- Upon completing a training program, Mr. McKelvey should pick up new concepts easily when appropriately presented.
- He is generally adaptive in a variety of training situations.
- His overall learning index is average and suggests a good potential for quickly learning new information.
- Overall, Mr. McKelvey may be expected to complete a typical training program with success.

Management Considerations

- While capable of meeting the challenge of advanced training, Mr. McKelvey may become frustrated during the more fundamental portions. Create enthusiasm during these phases by directing as much responsibility to participate as is possible.
- During fundamental training, use creative participation to maintain his motivation, which he may lose if not particularly challenged.
- Mr. McKelvey acquires and understands general information, but may find highly complex data or instruction challenging. His ability to conceptualize and utilize ideas put forth in training is high average, but not significantly beyond the norm.
- Require consistent performance by Mr. McKelvey in order to avoid boredom on his part. Colin will respond best to challenges in both the training and daily work experiences.

Verbal Skill

A measure of verbal skill through vocabulary.

Behavioral Considerations

- Colin should be capable of using basic verbal skills to communicate and help solve problems as necessary.
- He demonstrates a level of verbal skill equivalent to most people in the general population.
- Mr. McKelvey should be able to grasp simple communication principles that apply to the job.
- Mr. McKelvey is comfortable analyzing basic written and verbal information.

Management Considerations

- Because Colin demonstrates a high average vocabulary, monitor his communications with coworkers, observing the potential for miscommunication.
- Under situations of stress, Colin may lose patience with others when involved in communication. Counsel him on the frustration and provide alternatives to his typical means of communication.
- Mr. McKelvey may occasionally experience frustration communicating with others, due to a moderately high vocabulary level. Model appropriate levels of communication and recognize his efforts to moderate his own style.
- Colin demonstrates a high average vocabulary when compared to the general working population. On occasion his communications may appear too complex to others. If this occurs, redirect him privately on appropriate methods that are more pragmatic.

Verbal Reasoning

Using words as a basis in reasoning and problem solving.

Behavioral Considerations

- Mr. McKelvey is proficient in the use of words and language.
- Colin would not be expected to have any difficulty in effectively communicating thoughts and ideas to others.
- He demonstrates adequate and, in some areas, good verbal reasoning ability; certain areas and complexities will need training.
- Mr. McKelvey will typically assimilate information as well as most people in the general population.

Management Considerations

- While capable of processing verbal information and making decisions based on that information, be aware of any frustration Colin may experience when communicating with others of different ability levels. Coach him on appropriate techniques that can facilitate understanding by others.
- Proficient in verbal reasoning, Mr. McKelvey will work best when his verbal acumen is put to use.
- If he experiences frustration in expressing ideas to others, suggest that he say it in plain English or make his meaning more clear. Provide training as needed in adaptive communication.
- Depending on the audience, Mr. McKelvey may become frustrated by the attempts of others to understand his somewhat complex verbal information. Provide your advice in how to communicate ideas in a manner consistent with the verbal level of others with whom he interacts.

Numerical Ability

A measure of numeric calculation ability.

Behavioral Considerations

- Mr. McKelvey should be able to grasp mathematical principles that apply to the job.
- He may need assistance with complex mathematics or technical calculations.
- Colin is comfortable analyzing basic numerical material and performing some mathematical functions without relying on a calculator.
- Mr. McKelvey should be capable of learning basic mathematical principles as necessary.

Management Considerations

- Observe his performance in calculating complex data that convey multivariate information. Aid Colin as needed with a mentor or formalized training.
- To facilitate his development, you will need to have Colin trained in any advanced mathematics relevant to his work.
- He may become frustrated by tasks involving the calculation of complex data. If needed, provide training in appropriate mathematical areas and give consistent feedback.
- Mr. McKelvey may occasionally require additional time to process complex numerical information. Provide assistance in the form of available tools to aid in calculations.

Additional Considerations

Mr. McKelvey achieved a Numerical Ability score outside the job profile for this position. This suggests he is at a different level in calculating numerical data than the position typically requires. Discussions with him should determine his potential to perform at an appropriate level on the job.

Numeric Reasoning

Using numbers as a basis in reasoning and problem solving.

Behavioral Considerations

- His ability to assimilate information that requires reasoning with numbers is sufficient at a general level.
- Mr. McKelvey should be able to complete the numeric reasoning parts of the training process with little difficulty.
- He may prefer calculators for more complex mathematical analysis.
- Colin should not require additional time or repetition to accomplish numerical analysis.

Management Considerations

- To avoid miscommunications when Colin is expressing numerical information, coach him on proper communication techniques that emphasize a common level of expression as needed.
- Mr. McKelvey is capable of assimilating data to make decisions, but may occasionally be frustrated by a lack of challenge in this area. Address frustrations and provide ways to challenge his abilities.
- Colin is adept at seeing the relationship between numerical data and decision making. He may however, require extra challenges if not provided by the job to avoid a loss of motivation.
- Mr. McKelvey is more proficient in processing numerical information than most people. He may experience frustration if not sufficiently challenged, and may be willing to take on extra duties that allow him to practice this skill.

Energy Level

Tendency to display endurance and capacity for a fast pace.

Behavioral Considerations

- He prefers not to be pressured by critical deadlines and may need time to think things through.
- Colin will require clearly defined priorities and deadlines as well as some external urging and motivation.
- Mr. McKelvey may be more patient and better at working with methodical processes.
- Mr. McKelvey typically doesn't show a high sense of urgency. He might need help getting started on new assignments.

Management Considerations

- Colin is likely to lose focus on long-term projects. Provide ways for him to re-energize during periods of hard work. By organizing his time, he can allow short breaks to gather his motivational reserves and reflect on short-term accomplishments while maintaining a steady pace to meet daily goals.
- Mr. McKelvey may not respond well to the stress of strict deadlines. Maintain open communication during high stress periods and provide coaching in proven methods for handling stress.
- Mr. McKelvey requires the assistance of his supervisor to focus on long-term projects. Provide thorough supervision and set daily goals for timely results. Provide encouragement along the way.
- He may place a high priority on personal time over work time. Reward his efforts to do whatever it takes to get the job done by providing opportunities for self-motivation during non-peak periods of work.

Additional Considerations

On the Energy Level scale Mr. McKelvey is below the designated Performance Model for this position. This suggests that his capacity to endure hard work is less than the position typically requires and that he could have a problem with the high demands of this job. Discussions with him should explore the possibility that for Mr. McKelvey the energy required for this position may be above what he is willing to exert.

Assertiveness

Tendency to take charge of people and situations. Leads more than follows.

Behavioral Considerations

- Mr. McKelvey has a limited need to be in charge or be in control of people and situations.
- He tends to be a good listener and to be more comfortable as a participant in a group rather than as the leader.
- Colin tends to prefer solutions that are low risk and that have proven effective in the past.
- Mr. McKelvey is slow to be assertive and tends to be more of a follower than a leader.

Management Considerations

- When locked in a conflict with a team member, he may need feedback concerning his tendency to submit in a high stress situation. Assertiveness training may instruct him on how conflict need not be stressful.
- Colin may occasionally back down from his position if confronted by others on his team. Take an active role as mediator, fostering his ability to express himself in conflicts.
- Mr. McKelvey will occasionally follow the group consensus despite personal disagreements. Be perceptive of this and encourage debate and expression of alternate viewpoints when possible. Reward team members who adequately express themselves and he may respond appropriately in time.
- On occasion, Mr. McKelvey may be hesitant to provide input to the team. If necessary, encourage participation and spend time discussing his input. Reward him for these discussions.

Sociability

Tendency to be outgoing, people-oriented, and participate with others.

Behavioral Considerations

- His sociability is only moderately compatible with establishing a network of contacts.
- He may not always enjoy work that requires contact with the public.
- Mr. McKelvey is only moderately motivated by assignments that require interpersonal contact with people.
- Mr. McKelvey prefers direct and to the point communication and may avoid spending time on small talk and social amenities.

Management Considerations

- If you need to develop his ability to interact with the group, engage Colin in casual conversation. Breaking down walls of interpersonal distance between him and others may encourage better participation.
- In his interactions with team members, Colin may be hesitant on occasion to communicate his perspective. If needed, encourage participation and make a point of initiating his involvement if necessary. As time passes, he should become more comfortable with the group and provide his fair share of input.
- As a way to develop his interpersonal skills, invite Colin to as many group discussions as possible. Maintain a casual demeanor with him, as appropriate, to model the culture of your organization.
- On occasion, Mr. McKelvey may appear distant with the group. If necessary, support his efforts to interact with others and maintain consistency with your rewards.

Manageability

Tendency to follow policies, accept external controls and supervision, and work within the rules.

Behavioral Considerations

- He should be willing to conform to company policies without feeling any loss of personal freedom.
- Colin demonstrates a positive attitude concerning organizational constraints and restrictions.
- Mr. McKelvey is typically willing to accept guidance and suggestions from others.
- Mr. McKelvey is friendly, cooperative and should be fairly easy to manage.

Management Considerations

- Colin may fall back on concrete procedure when the task at hand becomes complex or stressful. If this tendency needs to be changed, do so by involving him in group discussions that require creative brainstorming and developing unique options.
- In a situation that appears frustrating, Mr. McKelvey may try to seek out supervision too quickly. If necessary, encourage independence by providing leading questions that challenge him to create his own solutions.
- If it becomes necessary to decrease his reliance on procedural norms, demonstrate in your daily work how it is acceptable to bend the rules within the limits of your organizational culture. Provide assistance initially, until he gains the confidence to make independent choices.
- Mr. McKelvey appears to prefer a strict procedural structure to help guide his daily work pattern. If it becomes necessary, help him break out of this mold by encouraging independence. Reward efforts to develop creative solutions to accomplishing tasks.

Attitude

Tendency to have a positive attitude regarding people and outcomes.

Behavioral Considerations

- Colin has positive expectations for the outcome of problems and difficult situations.
- He is usually enthusiastic about risk, change and unexpected challenges.
- Mr. McKelvey demonstrates a positive attitude regarding changes in policies and guidelines.
- Mr. McKelvey has a tendency to trust most people.

Management Considerations

- Mr. McKelvey may appear overly optimistic or naïve about the motivations of others which may be a liability in some situations. If it becomes necessary to develop a more realistic attitude, encourage him to observe his more successful co-workers and offer an opportunity to discuss the differences with you.
- Colin appears to have a higher than average optimism concerning the motivations of others. Training in more prudent estimations of the motivations of others may enhance his quality of work if he becomes too trusting.
- Colin may exhibit an overly optimistic expectation about the results of some projects. This can allow unforeseen mistakes to occur. Training in evaluative reasoning may provide him with the ability to use judgment to forecast potential hazards appropriately.
- Having a generally optimistic regard for the motivations of others, Mr. McKelvey may not accurately appraise people's motives, especially if he is actively negotiating with someone. If this becomes an issue, encourage discerning evaluative skills so that he may approach dealings with others with more prudence and confidence.

Additional Considerations

On the Attitude scale Mr. McKelvey scored outside the designated profile for this particular Performance Model. This suggests his level of trust is different than the position typically requires and he may have an inappropriate outlook in some situations. Discussions with him should explore the possibility the position may be challenging to him.

Decisiveness

Uses available information to make decisions quickly.

Behavioral Considerations

- Mr. McKelvey is capable of making timely decisions, but may hesitate when under stress.
- He can be a competent decision-maker when given enough time, but has difficulty taking decisive action under pressure.
- Colin tends to be cautious, preferring to wait for more information and advice before taking action.
- Mr. McKelvey may be inclined to delay important decisions if he feels ill-prepared or disorganized.

Management Considerations

- If Colin needs to make quicker decisions, remind him that we have to take risks when timely decisions are required. Build this risk acceptance by providing low risk situations, then building the potential for risk as he adapts.
- When under stress, Mr. McKelvey may tend to make decisions slowly. If this causes problems, emphasize the importance of deadlines and making decisions without extended analysis.
- Should his relatively low decisiveness level become an issue, provide training in risk management as well as how to handle stress. This should help Mr. McKelvey make more timely decisions under pressure.
- If more timely decisions are required, build his willingness to take action by example of your own capacity to act with a sense of urgency, even when under stress.

Accommodating

Tendency to be friendly, cooperative, agreeable. To be a team person.

Behavioral Considerations

- Colin is modest and not inclined to take an extreme opinion or position.
- He is generally pleasant, friendly and patient, not inclined to show temper or frustration.
- Mr. McKelvey typically recognizes the need to work with others and is usually willing to share resources and information.
- Mr. McKelvey tends to have a cooperative outlook, and is generally prepared to help others.

Management Considerations

- Mr. McKelvey tends to accommodate others when conflict seems inevitable. If this is undesirable, encourage him to practice assertiveness with a team member, reinforcing the confidence necessary to confront others.
- When involved in a discussion, Colin may back down too easily when a more self-confident approach would be better. If necessary, training in group dynamics and productive negotiation may develop a greater sense of confidence that allows him to stand up more readily for his ideas.
- In the pursuit of individual goals, he may lack a sense of urgency. Provide feedback that directs specific actions, creating an enthusiasm for immediate results and prompting individual accomplishment.
- If feeling frustrated and stressed, Mr. McKelvey may express a desire to communicate more with his coworkers, taking a more facilitative or cooperative approach. Recognize and affirm his feelings, but provide a model of enthusiasm that will help maintain a competitive spirit.

Independence

Tendency to be self-reliant, self-directed, to take independent action, and make own decisions.

Behavioral Considerations

- He appreciates the need for regular supervisory feedback.
- He may seek approval and feedback from his supervisor more often than others.
- Mr. McKelvey prefers to be provided with a methodical and planned approach to performing the job with a specific plan for how things are going to be done, including a to do list.
- Colin thinks that job responsibilities should be defined so that everybody knows just what is expected. He prefers carefully defined job descriptions, guidelines and policies.

Management Considerations

- His reliance on a structured work environment may cause frustration if he is required to work without supervision. Discuss his concerns when he appears frustrated and provide moderate supervision. Encourage a self-reliant approach and the flexibility of self paced work.
- Mr. McKelvey prefers supervisors to create structure in his duties. Respond to his dependence, but if more independence is desirable, gradually let go, allowing him to become accustomed to independent work. Always maintain your availability, but encourage personal decision making.
- Colin may appear overly reliant on your supervision. If necessary, encourage independence by providing small doses of supervision, being observant of his limits. Gradually, allow him to make mistakes and provide immediate constructive feedback.
- If you want to develop more self-reliance in Mr. McKelvey, you will need to provide opportunities for independent decision making. Reward independent thinking and allow him room to grow more self-confident. Be patient.

Additional Considerations

On the Independence scale Mr. McKelvey is below the designated Performance Model for this position. This suggests that his tendency to seek guidance from supervisors is greater than that of successful individuals in this position. He could have a problem with the capability to work independently and resourcefully. Discussions with him should explore the possibility that for Mr. McKelvey, the position may be overly challenging and could lead to frustration and a reduction in his level of performance.

Objective Judgment

The ability to think clearly and be objective in decision-making.

Behavioral Considerations

- Mr. McKelvey has a judgment style that works well with routine problems and decisions.
- Mr. McKelvey sometimes favors subjective thinking when making decisions.
- Colin uses judgment that is compatible with concrete situations and tangible data.
- When pressured, Mr. McKelvey reaches conclusions that may tend to be inconsistent.

Management Considerations

- On occasion, Mr. McKelvey may become frustrated when required to apply hard facts to his decision making process. Encourage him to take the time to review all the information before coming to a decision. In time, this practice will become easier and more efficient.
- When fast decisions must be made, Colin is able to rely on intuition. Training should focus on assimilating a thorough collection of the necessary information, even if on a deadline, so that he can make timely and objective decisions.
- Provide training that allows Mr. McKelvey to identify the potential sources of bias that occur in day to day decision-making. Give feedback when needed so that he can track his progress and adjust his techniques.
- When necessary, coach him on how to discern useful information from a mass of input so that timely decisions can be made emphasizing the facts and not assumptions.

Additional Considerations

Mr. McKelvey achieved a Judgment score that is outside the designated profile for this Performance Model. This suggests that his objectivity in making decisions is different than the position typically requires. Discussions with him should explore the possibility that for Mr. McKelvey, the position may require greater practicality and could lead to a reduction in his level of performance.

Interests

The Interests section assesses the relative interests between the six interest areas. The top three interests for Colin and the Performance Model are presented below in ranked order. The interests shared by both are circled.

Top Interests for Colin McKelvey

Financial/Administrative

Indicates interest in activities such as organizing information or business procedures.

Technical

Indicates interest in scientific activities, technical data, and research.

Mechanical

Indicates interest in working with tools, equipment, and machinery.

Top Interests for this Performance Model

Financial/Administrative

Technical

Enterprising

Indicates interest in activities associated with persuading others, sales, and presenting ideas.

 = Match

Mr. McKelvey may be attracted to positions that allow him to work with details, systems and methods for standard business practices, especially in the industrial/technical arena. His interest focus lies among the Technical, Financial and Mechanical themes on the ProfileXT. This is a common pattern for people who enjoy operations responsibilities and who enjoy the detailed, technical aspects of solving problems, setting up systems and establishing methods in the technical/industrial world.

With Financial/Administrative as his primary area of interest, Mr. McKelvey is likely to seek out activities that involve organizing or otherwise dealing with budgets, information and/or supplies. His primary focus and source of motivation is in classifying and managing information.

Secondly, he is motivated by the Technical aspects of a job. Working with data and drawing conclusions from them helps him maintain a positive level of motivation on the job.

Finally, his interest in Mechanical activities rounds out his profile. It promotes a concentration in opportunities to get involved directly, getting his "hands dirty" with an objective that is tangible, practical and functional. While not the focus of his interest profile, Mechanical is a factor nonetheless.

Additional Considerations

Mr. McKelvey does not show Enterprising activities as one of his top three interest areas. He may not find activities associated with this theme as motivating as those individuals who have been successful in this position.
