

Daily Health Screening Assessment

Thank you for participating in our daily health screening assessment. This screening tool includes a series of seven (7) questions that guide you through state protocols and interim guidance to help you assess whether or not you should be tested for COVID-19. The assessment includes demographic information and the type of contact you have had with others who may be exposed. NYS requires that we conduct this assessment daily and confidentially maintain a log of all your completed assessments.

Note: Should testing be required and you test positive, you will be asked to self-quarantine and we are required to notify state and local health authorities. Additionally, depending upon circumstances we may also need to begin contact tracing to determine impact to other employees/customers/suppliers and also to begin cleaning procedures for the facility area(s) affected.

1-Do you have any of these symptoms? Symptoms may appear 2-14 days after exposure to the virus. Please select all that apply. *

- Fever or chills with a temperature greater than 100 degrees
- Dry cough
- Shortness of breath or difficulty breathing
- Sore Throat
- Congestion or runny nose
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Nausea or vomiting
- Diarrhea
- None of the above

2-Do you work as a...? *

- Essential employee with frequent direct contact with the public while working?
- Essential employee with occasional direct contact with the public while working?
- Essential employee with seldom direct contact with the public while working?
