If You're Not Selling IAQ, You're Leaving \$\$\$ on the Table

(Start Now!! Ask for your **FREE** Customer Checklist)

Providing the right IAQ solution can grow your IAQ business

What are the Conditions in Your Customer's Home? (check all that apply)

Does anyone in your customer's home suffer from or care about:

- ☐ Respiratory issues, such as asthma or allergies
- ☐ Sniffles, sneezes, colds or flu
- ☐ Mold, mildew or other bacterial growth
- ☐ Dust mites

When at home, does your customer ever notice:

- ☐ Stale odors, smoke or chemical fumes
- ☐ Dry skin, hair or electric shocks
- ☐ Clamminess or excess perspiration
- ☐ Rooms that don't heat or cool properly

Has your customer ever noticed or been concerned about:

- ☐ Cracks in wood flooring, drywall and/or wood instruments
- ☐ Bad odors, mold or mildew in the basement or crawlspaces
- ☐ Condensation on the inside of windows
- ☐ Optimal performance from the heating and cooling system

Does your customer have:

- ☐ A newer or newly remodeled home with tighter construction
- ☐ A home that always feels cold, even at normal temperatures
- ☐ Concerns about the environment and want to manage heating and cooling responsibly
- ☐ Concerns about the cost of heating and cooling

Snap-On Automatic Shutoff Valve

**No Tools
Required!**

Snap-On Valve Controller
L49-962
#8852000

Leak Sensors
L49-668
#8850600

Hub 3.0
L49-961
#8850830

Automatic Shutoff Valve for Main Water Supply: L49-962

- No tools or pipe cutting required for installation – snaps onto the existing main valve
- Fits on ¾" and 1" water pipes
- Works with any kind of ball, gate or globe valve
- Calibrates the torque required to turn off the main valve and adjusts if necessary
- Includes battery backup in case of power failure

LeakSmart System Hub 3.0: L49-961

- The Hub connects to the home's internet so homeowners can receive notifications through their smart phone if a leak for freezing temperature is detected
- Built-in Wifi makes it so the Hub 3.0 doesn't require an Ethernet wire connection to the home's Internet
- Depending on system set-up, the Hub will either shut off the LeakSmart valve or notify the homeowner when a leak is detected.
- New Zigbee 3.0 protocol increases range and strengthens communication between the leak sensors and the valve.
- Works with the new Snap valve (L49-962) as well as the original cut-in valves

Offer expires 02/28/19

Condensing boiler	500 to 999 MBH $\geq$ 92% Thermal Efficiency	\$3,000
Condensing boiler	1000 to 1700 MBH $\geq$ 92% Thermal Efficiency	\$6,000
Condensing boiler	$\geq$ 1701 MBH $\geq$ 92% Thermal Efficiency	\$9,000
On-demand water heater	$<$ 200 MBH $\geq$ 0.87 Uniform Energy Factor (UEF)	\$400
On-demand water heater	$\geq$ 200 MBH $\geq$ 94% Thermal Efficiency	\$500
Indirect fired water heater	$\leq$ 50 gallon storage, attached to boiler w $\geq$ 85% AFUE or Thermal Efficiency	\$100
Indirect fired water heater	$>$ 50 gallon storage, attached to boiler w $\geq$ 85% AFUE or Thermal Efficiency	\$300
Condensing standalone water heater	$\leq$ 140 gallon storage; input capacity $\geq$ 75,000 BTU/h; $\geq$ 94% Thermal Efficiency	\$650

Residential account with SC-1 rate code qualify for program. New Construction and Replacement qualify for the program. Commercial accounts with SC-2, SC-3, SC-5, SC-7 and SC-8 rate code qualify for program. New Construction and Retrofits qualify for the program.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and change. From the first settlers to the present day, the nation has evolved through various stages of development. The early years were marked by exploration and settlement, followed by a period of rapid expansion and industrialization. The American Revolution and the Civil War were pivotal moments in the nation's history, shaping its identity and values. The 20th century brought significant social and political changes, including the rise of the New Deal and the Civil Rights Movement. Today, the United States continues to face new challenges and opportunities, reflecting the ongoing nature of its history.

What is FER?

New Regulations on the Horizon: Fan Energy Rating (FER)

While HVAC contractors, distributors and manufacturers all enjoyed a rare year with no new federal regulations impacting the industry in 2017, it's time to begin understanding the next set of major federal regulations scheduled to take effect. **Fan Energy Rating (FER) will take effect in 2019**, but preparations to meet these new standards have been underway for some time already.

In 2014, the US Department of Energy established the first national efficiency standards for furnace fans. FER specifies a maximum fan energy rating that varies based on the airflow provided by the furnace fan.

FER is expressed in terms of power consumption (W) per delivered airflow (1000 cfm) and incorporates energy consumption in three different modes: heating, cooling, and constant circulation.¹ These new standards will require a whopping 46% watt reduction over a typical PSC furnace.

What is the purpose of these new regulations?

The FER standards are intended to reduce US energy consumption. Reduced energy consumption will in turn save consumers money on energy bills and cut carbon pollution.

For example:

A standard furnace fan for a 70,000 BTU-per-hour furnace consumes approximately 1,000 kilowatt-hours per year. The FER standards could reduce energy use by 46%.²

Additionally, since the furnace fan is a previously unregulated component of HVAC systems, it is also likely that these regulations could boost innovation.

When does FER take effect?

These regulations will take effect on July 3, 2019. Each furnace manufacturer must ensure their entire line of furnaces is in compliance by that date.

Preparation has been a multi-year process. A significant portion of every manufacturer's furnace line are being re-engineered to meet these new regulations.

What does FER mean for HVAC distributors and contractors?

Manufacturers will be rolling out new lines of more efficient furnaces designed to meet and exceed FER standards throughout the first half of 2019. Stay tuned for a steady stream of product announcements.

Rest easy knowing that Johnstone Supply will be ready for the FER regulations when they take effect.

PARTNERSHIP +

Training Locations:

835 Canal St
Syracuse, NY 13210

Wed, December 11, 2019
11:00 AM - 2:00 PM

Do you have all the right tools, but **STILL** can't close the deal?!

Presented by Samantha Rumpsa, Sales representative for FTL Finance, this brief seminar will introduce you to the world of consumer financing.

Did you know ...

- Contractors who offer financing **close 35% more jobs.**
- Roughly 3/4 of Americans are living paycheck to paycheck.
- The average financing consumer **spent 40% more** than cash purchasers.
- HVAC is typically an unplanned, unavoidable expense that consumers can't otherwise afford.

This is not your garden-variety finance program. Johnstone Supply has partnered with FTL Finance to offer you a unique and exclusive opportunity to enhance your sales pitch. Even if you currently offer financing, this program is still worth considering.

Easy and simple from registration to funding, this program removes the barriers to financing. **There are no contractor credit checks or bank statements required, nor are there any monthly minimums or miscellaneous charges.**

FTL Finance only works with HVAC contractors so they know your business well. From large and elaborate equipment installations to small service-only projects FTL is able to finance it all.

Register for this program today and learn how this tool will help you close more profitable sales today.

Grow your business with Johnstone Supply and FTL Finance, your partners in success!
