Our Best Price Guarantee!

If the products quoted above don't compare to what you are currently running, or if the pricing is more than what you are paying now -- simply let us know! A copy of a recent check or invoice from your current provider will allow us to do what we can to give you an apples to apples comparison.

Criminal Search Product Information

County Access Fees - Some county courts charge a fee to release a copy of their court records. In these instances, we will pay for these fees up front in order to obtain the records, and then bill you for the fee on your next invoice. A County Access Fee list is available upon request, and it is the responsibility of the client to be aware of potential fees.

Multi-State Database Search - Includes all available counties in all available states. If a crime was committed outside of the counties where someone has lived, this database is your best chance at finding it. If a criminal hit is found in the Multi-State Database Search, by law we are required to pull the County Criminal record to obtain all available information and to verify the record. If you aren't currently including this in your background checks – you should be.

National Sexual Offender Registry Search - Includes all offenders currently registered with the National Sex Offender Registry.

SSN Trace - Using the SSN of your applicant, we provide a history of previous addresses and names for every person associated with that SSN. This address history trace is what we use to pull the county criminal records where someone has lived during the last seven years.

Alias Search – Our SSN Trace will search for and disclose Alias names that have been used in conjunction with the Applicant's SSN.

County Criminal Record Search - County Criminal Court Records are where the most thorough and up-to-date criminal case information is stored . A county search will typically disclose convicted Misdemeanor and Felony records, as well as the: jurisdiction, type of offense, offense description, case number and case disposition.

Federal Court Records - Federal criminal, civil or bankruptcy searches can identify records such as interstate drug or arms trafficking, identity theft, embezzlement, kidnapping or crimes that occur on Federal property. These records are especially useful for management & financial positions.

Motor Vehicle Reports (MVR) - Instant in most states, but can take up to two days. Additional state access fees may apply. MVR state access fee guide is available upon request. Annual MVR Report Runs available!

Types of Verifications

Employment Verification attempts to verify dates of employment, position, salary, reason for leaving, and potential re-hireability.

Education Verifications verify dates of attendance, areas of study and degrees obtained. Professional License Verification verifies professional licensure and standing.

DOT Verifications can be performed for anyone applying to a DOT regulated position in compliance with FMCSR laws. Both Safety Performance and Drug and Alcohol History are verified.

Third Party Fees -- At times employers use third party verification systems to outsource verifying employment. At setup you choose whether or not you want us to still perform verifications that require these additional fees.

Drug Testing Information

How does the Drug Testing work?

1. You place the order for a drug test.
2. We find the facility! Using the applicant's home address, we find the lab that is closest to them from our Nationwide Network!
3. An email is automatically sent to the applicant telling them what facility to go to for their drug test, what to bring with them, and how long they have to complete the test.
4. Drug test results are usually available the same day if the test is negative.
5. Any Medical Review Officer (MRO) fees are included in the cost of the test.
6. We pay the labs and clinics and simply invoice you with your Background Checks.

5 Panel Test Includes: Cannabinoids (THC), Cocaine, Amphetamine, Opiates, Phencyclidine (PCP). Rapid 5 Panel Tests available as well as lab processed tests.

DOT Test Includes: Cannabinoids (THC), Cocaine, Amphetamines (Methamphetamine and MDMA), Opiates (Codeine, Heroin (6-AM), Morphine, Phencyclidine (PCP))

10 Panel Test + Oxy: *OxyContin (a narcotic pain killer) is NOT included in standard drug tests, so we have added it as an additional panel due to the heavy abuse of OxyContin. A drug test that includes Opiates alone will NOT show OxyContin.

The quoted rates will be honored for 3 months past the date of quote, and sold client rates are guaranteed for 12 months. Rates are subject to review by ProScreening anytime thereafter. Any State or County Access Fees are not included in the quoted prices and will be billed to the client separately as a pass through fee. Alias or alternate names require separate court record requests and are billed individually.
