The Advantage Formulary

Capital Blue Cross created the Advantage Formulary to give members access to quality, affordable prescription drugs and to provide physicians with a list of preferred drugs for cost-effective prescribing.

How the Formulary was Developed

The Advantage Formulary was developed and is maintained by the Capital Blue Cross Pharmacy and Therapeutics (P&T) Committee. This committee, composed of practicing physicians from various medical specialties, practicing pharmacists, and other healthcare providers, reviews drugs in all therapeutic categories based on safety and effectiveness and designates the most effective agent(s) in each class. The P&T Committee regularly reviews new and existing drugs to ensure the Advantage Formulary remains responsive to the needs of our members and providers.

Requests for Reconsideration (for Providers)

Providers may request a reconsideration of tier status for a drug on the Advantage Formulary by completing a Formulary Status Reconsiderations form or by writing a letter indicating the significant advantages of the specific drug and mailing it to the address below:

**Pharmacy Services
Capital Blue Cross P&T Committee
P.O. Box 773735
Harrisburg, PA 17177-3735**

The P&T Committee will review drug-specific requests and communicate the results of the review to the requesting provider. Review of requests concerning specific patients must follow the dispute and appeal process.

Generic Drugs

Generic drugs are typically the most affordable and offer a lower cost share than brand-name drugs. The active ingredient in a generic drug is chemically identical to the active ingredient in the brand-name version. To help lower your out-of-pocket costs, choose generic drugs whenever possible. This can result in long-term savings, especially in the case of drugs taken daily and refilled frequently. Choosing a brand-name drug when the generic version is available could result in a reduced benefit and higher out-of-pocket cost.

Generic Drug Substitution

Capital Blue Cross encourages generic drug substitution if the U.S. Food and Drug Administration (FDA) has determined the generic drug is bioequivalent to the brand-name product. Depending on your prescription drug plan, one of the following generic substitution policies will be applied. What the member pays for a brand-name drug when a generic version is available varies depending on the member's generic substitution program. Check your plan documents to find which program applies to you.

- ***Mandatory generic substitution:*** If a generic drug is available, and the physician indicates "Dispense as Written" (DAW) or if a member requests the brand-name drug, the member must pay the cost difference between the brand-name drug and its generic cost. The member also must pay the applicable brand copayment and/or coinsurance, up to the original cost of the brand-name drug.

Restricted generic substitution: If a generic drug is available and a member requests the brand-name drug, the member must pay the cost difference between the brand-name drug and its generic cost. The member also must pay the applicable brand copayment and/or coinsurance, up to the original cost of the brand-name drug. If the physician indicates DAW, then the member pays the

applicable copayment and/or coinsurance for the brand product and need not pay the cost difference between the two drugs.

- *Voluntary generic substitution:* The member pays only the applicable copayment and/or coinsurance for the brand-name drug.

Non-Prescription Drug (OTC) Policy*

Select over-the-counter (OTC) products may be covered as determined by Capital Blue Cross or mandated by the Patient Protection and Affordable Care Act (PPACA).

If a prescription drug has an available OTC equivalent, the prescription drug will not be covered. Physicians and pharmacists should guide members to the OTC equivalent product, when appropriate.

*As mandated by PPACA, select OTC drugs may be covered at \$0 cost share for members with individual coverage or members of a nongrandfathered group health plan. Please consult your employer for questions about grandfathered status.

Compound Drug Policy

Prescribed compound drug products are considered Brand Non-Preferred (BNP) and may require prior authorization.

Benefit Exclusions/Limitations**

Depending on your prescription drug plan, some drugs listed may not be covered. Examples of contractual exclusions include:

- Appetite suppressants (weight loss)
- Drugs used for cosmetic purposes (wrinkles, hair loss, etc.)
- Erectile dysfunction drugs
- Non self-administered injectable drugs
- Experimental and investigational (including off-label use) use
- Some types of vitamins (non-prenatal)
- Products with OTC equivalents

Some members' employers may choose to purchase additional coverage for these drug classes, while other employers may choose to exclude these drug classes from their Capital Blue Cross prescription drug plan.

**As mandated by PPACA, select drugs in these drug classes may be covered at \$0 cost share for members with individual coverage or members of a nongrandfathered group health plan. Please consult your employer for questions about your grandfathered status.

Specialty Drugs

Specialty drugs are used in the treatment of medical conditions such as hepatitis, multiple sclerosis, and rheumatoid arthritis. Specialty drugs may be oral or injectable drugs that can either be self-administered or administered by a healthcare professional. Specialty drugs are distributed through your plan's" specialty pharmacy provider, AllianceRx Walgreens Prime. You or your doctor can call 800.533.7606 (TTY: 866.830.4366) or fax 844.834.2550 to receive information on starting service.

Injectable Drug Policy

Self-administered pharmacy injectable drugs are usually covered under the Capital Blue Cross prescription drug plan. Injectable drugs that are not routinely self-administered are not covered under the prescription drug plan, but may be covered under your medical benefit. Select medical injectable drugs may be available from AllianceRx Walgreens Prime (by calling 800.533.7606 (TTY: 866.830.4366) or faxing 844.834.2550), Capital Blue Cross' specialty medical injectable provider, which will assist with distribution and billing of these drugs.

On behalf of Capital Blue Cross, AllianceRx Walgreens Prime, an independent company by Walgreens Specialty Pharmacy Holdings, LLC, assists in dispensing home delivery and specialty medications for our members.

Utilization Management (UM)

Prior Authorization (PA): Your prescription drug plan may require prior authorization for certain drugs. This means that your doctor will need to submit a request for coverage of these drugs, which will need to be approved before the drug will be covered under your plan. If a prior authorization is commonly required for a drug listed in this document, it will be noted with a dot in the prior authorization column next to that drug. Some plans may require prior authorization on additional drugs beyond those noted in this document. Refer to your prescription drug plan materials for details about your particular benefits.

Step Therapy (ST): Your prescription drug plan may include an step therapy for certain drugs. This means you may need to try another proven, cost-effective drug before coverage may be available for the drug included in the program. Many brand drugs have less expensive generic or brand alternatives that might be an option for you. If an step therapy is commonly required for drugs in this document, they will be noted with a dot in the step therapy column next to that drug. Some plans may have step therapy programs on additional drugs beyond those noted in this document. Refer to your prescription drug plan materials for details about your particular benefits.

Quantity Level Limits (QLL): Certain drugs have a quantity level limit to support safety. These drugs will be noted with a dot in the quantity level limits column next to the drug. Limits may include quantity of covered drug per prescription, quantity of covered drug in a given time period, coverage only for members within a certain age range, and coverage only for members of a specific gender. If your doctor prescribes a greater quantity of drug than what the quantity level limit allows, you can still get the drug; however, you will be responsible for the full cost of the prescription beyond what your coverage allows.

Special Programs

Medication Synchronization: You may obtain a partial fill or refill of your maintenance prescription drugs at your option when you are taking two or more maintenance medications. This can help make it easier for you to take medications correctly as prescribed. You can work with your in-network retail* pharmacist to receive up to 28 days' worth of a maintenance medication, so that the refill syncs up with another maintenance medication. Additionally, we will prorate your applicable cost-share amounts (e.g., copay or coinsurance) to align with the reduced supply. You can initiate a synchronization up to three times per year. (This program does not apply to mail order prescriptions through AllianceRx Walgreens Prime.)

Split Fill: To minimize waste and reduce your costs for certain pharmacy-dispensed specialty drugs that have a high potential for adverse side effects, we will "split fill" (i.e., partial fill) select specialty drugs for up to three months when you are new to treatment. New to treatment means, you receive a prescription of a select drug and have had no claims history of the drug in the past 120 days. The goal is to confirm effectiveness and tolerance before you receive a full supply.

- Specialty drugs selected for this program are noted in the Guide to Prescription Drug Benefits on CapitalBlueCross.com. The select drugs are subject to change at Capital Blue Cross' discretion.
- You may call the phone number on the back of your member ID card or work with your pharmacist to opt out of this program and receive a full supply if you wish.
- We will prorate your copays to align with the reduced supply.
- Prior authorization and quantity limits may apply.

Note: Some state laws may not allow a prescription drug plan to cover certain controlled substance drugs if they are dispensed in a quantity greater than the dispensing limit. You will be responsible for the full cost of the prescription, with no benefits applied, if the dispensed quantity exceeds the dispensing limit.

How to Use This List

The easiest way to find a drug on the list is to use the search function:

Use the **Control** and **F** keys on your keyboard, or go to **Edit** in the drop-down menu and select **Find/Search**.

Type in the word or phrase you are looking for and click on **Search**.

This list is organized into broad therapeutic categories. For example, Respiratory Agents is a broad category. Within most categories, drugs are sub-grouped based upon drug class, for example under Respiratory Agents you will find Antihistamines. All drugs listed, whether generic or brand, are formulary drugs. The graphic below shows the information provided in each column of the drug list and is an example only.

1	2	3	4	5	6		
Drug Name	Tier	Specialty	Prior Authorization	Enhanced Prior Auth	Quantity Level Limits	PHC	Limited Distribution

1 Column 1 (**Drug Name**): lists the drug name.

Generic drugs are listed in lowercase **boldface**. Brand name drugs are CAPITALIZED.

Separate drug entries are required for some dosage forms such as extended-release and delayed-release.

2 Column 2 (**Tier**): indicates the Tier level.

- Generics Preferred are marked with a “GP”
- Generics Non-Preferred are marked with an “GN”
- Brands Preferred are marked with a “BP”
- Brands Non-Preferred are marked with an “BN”
- Specialty Preferred Drugs are marked with a “GP”, “GN”, or “BP.” These drugs are also marked with a dot in the Specialty column.

- Specialty Non-Preferred Drugs are marked with an “BN.” These drugs are also marked with a dot in the Specialty column.

- 3 Column 3 (**Specialty**): indicates if the drug is a specialty drug and needs to be filled at a participating specialty pharmacy in our network.
- 4 Columns 4, 5, and 6 (**Prior Authorization, Step Therapy, Quantity Level Limits**): indicate Utilization Management (UM) Program that apply to the prescription drug (e.g., Prior Authorization, Step Therapy, and Quantity Level Limits). If an indicator is present in a column, then the pharmacy program applies. Some plans may have UM on additional drugs beyond those noted in this document.
- 5 Column 7 (**PHC**): indicates Preventive Healthcare. Drugs that have been reviewed by the Capital Blue Cross P&T Committee and are mandated by PPACA to have \$0 cost share for members with individual coverage or members of a group health plan that is not “grandfathered” under PPACA. Please consult your employer for questions relating to grandfathered status.
- 6 Column 8 (**Limited Distribution**): indicates if the drug is considered Limited Distribution, meaning there is a restriction on which pharmacies can dispense them. This limits where the member may obtain the prescription. Members may be required to use another pharmacy for limited distribution prescription drugs.
