**THE MIDDLEFIELD BANKING CO.
ANNUITY CONTRACT NUMBER 4-21047**

**GUARANTEED INTEREST ACCOUNTS
FAIR MARKET VALUE REPORT
FOR THE PERIOD
01/01/2017 THROUGH 02/14/2017**

Your Employer Statements show the contract value of your Guaranteed Interest Accounts. This is the value paid when funds are withdrawn at maturity or for a benefit event. This report shows the FAIR MARKET VALUE of each of your Guaranteed Interest Accounts.* (Pooled separate account assets are already shown on your Employer Statements at market value.) The fair market value of the account is the value paid when funds are withdrawn prior to their maturity. Refer to your Group Annuity Contract for additional information.

If the applicable interest rate is equal to or less than the interest rate on the account, the fair market value is equal to the contract value.

If the applicable interest rate is greater than the interest rate on the account, the fair market value is the contract value reduced by a percentage. This percentage is equal to:

1. The difference between the applicable interest rate and the interest rate on the account, multiplied by
2. The number of years (including fractional parts of a year) until the maturity date.

This is intended as a general explanation of the fair market value of Guaranteed Interest Accounts. Your contract contains the official explanation.

*The American Institute of Certified Public Accountants' Statement of Position 94-4 requires you to report retirement funds of investment contracts at a fair market value on your IRS Form 5500 series annual report and financial schedules. Contracts with insurance companies that do not incorporate mortality or morbidity risk are considered investment contracts. This is an investment contract. This requirement is effective for plan years beginning December 15, 1994. Please be sure your accountant or financial advisor receives a copy of this report.
